Policy # SI-03-2010

Policy Title: Individuals Listed on Animal Protocols

Policy: Except for students registered in University of Connecticut (UConn) classes or UConn-recognized programs (See IACUC Policy #SI-04-2010), all individuals conducting research or teaching activities with live animals at UConn must be listed on a protocol. The Principal Investigator (PI) must list the names and status of all such personnel, including faculty, post doctorate fellows, graduate students, undergraduate students, and any other research assistant or technician, (whether paid or not). Any individual visiting a PI’s lab who will be working with animals must also be listed. Each individual’s training and experience with the species and procedures used, and the specific nature of their responsibilities on the current protocol, should also be described. Any questions regarding whether or not an individual should be listed should be directed to the IACUC Executive Program Director.
