Title: Research Discounts for SODM Clinical Research/Clinical Trials	
Relates to Policy/Procedures: 904-14, SODM 2012-2; 2012-3	
SOP#: 906-14	Version 2.0
Prepared by: J. Kulko	Original date: 5/23/14
Approved by: J. Kulko	Date approved: 8/19/16

Purpose and Applicability:

To encourage researchers in the School of Dental Medicine (SODM) at UConn Health to engage in clinical trials that are sponsored, supported and/or investigator initiated.

Background and Significance:

This policy supports an agreement between UConn Health and sponsors of Clinical Trials that affirms there will be given a uniform, stated discount to Principal Investigators engaging in clinical research/clinical trials, and that charges to which the discount will be applied will remain constant for a period of three years from the date of the final budget memo.

Scope:

This policy applies to all SODM clinical research/clinical trials projects involving research induced dental/medical interventions and research-related patient charges generated from dental, medical, behavioral, social science, outcomes and health services research involving human subjects conducted within UConn Health.

Responsibilities:

OCTR Administrative & Clinical Research Coordinator under the direction and supervision of the OCTR Executive Administrator is responsible for applying the correct and current research discount to the Budget Workbook at the time it is completed.

Procedural Steps:

The OCTR Administrative & Clinical Research Coordinator will:

1. Determine the source of the funding
2. Determine source of charges (SODM, JDH, UMG and/or) and apply the correct discount rate to the budget workbook.

See APPENDIX C for current dental discount rate

See APPENDIX A SOP 904-14 for JDH and UMG current discount rate
