## Eyewash Inspection Log

Location: \_\_\_\_\_ Year: \_\_\_\_\_

**Instructions:** Flush eyewash station for 3 minutes. Ensure the unit is working properly. If it is, place full name and date in the appropriate box. If not, annotate problem in box, **highlight in red** and request Facilities Operations & Development for service (x2125). Place “Out of Service” sign on unit until repaired.

**Schedule:** *Department of Public Health regulated infectious agent laboratories are required to perform weekly inspections.*

Month	Week 1	Week 2	Week 3	Week 4	Week 5
January					
February					
March					
April					
May					
June					
July					
August					
September					
October					
November					
December					

**NOTE:** *According to applicable regulatory standard, the eyewash station must be located so that an affected employee can walk to it in 10 seconds (this translates to approximately 55 feet). Work should not be performed so close to the eyewash station that it becomes contaminated.*
